POPULATION AND DEVELOPMENT REVIEW

Cumulative Index to Volumes 1-10 1975-1984

The **Population and Development Review** seeks to advance knowledge of the interrelationships between population and socioeconomic development and provides a forum for discussion of related issues of public policy.

Published quarterly under the editorial auspices of the Center for Policy Studies of The Population Council, One Dag Hammarskjold Plaza, New York, New York 10017 USA

Foreword

This cumulative index covers the first 10 volumes of *Population and Development Review*. It supersedes the brief listing, Cumulative Contents to Volumes 1–5 1975–79, appended to the December issue of Volume 5.

The index has three main parts. First is a numbered listing of items in the Articles, Notes and Commentary, Data and Perspectives, Archives, and Documents departments of the *Review*, and full-length book reviews. The ordering is alphabetical by author, except in the case of archives and documents, which are separated out at the end of the listing. Archives are arranged chronologically by date of item, documents by order of appearance in the *Review* (which usually corresponds closely to date of item). The final numbered document entry refers collectively to the brief quotations that have appeared in the Documents department of some volumes.

The second part comprises three indexes of these numbered items, referencing them by number: an analytic index, an author index of archives, and a geographic index of documents. The analytic index is a compromise between a broad classificatory scheme in which each journal item is assigned to a single subject area and a detailed page-by-page index of subjects and proper names. Items on average are indexed under four topical entries, often with both subject and geographic specificity.

The final part of the cumulative index facilitates access to other material appearing in the *Review:* listings of quotations and books reviewed. The list of books, alphabetical by author, includes for completeness books accorded full-length reviews (which appear also, by author of review, among the numbered entries); where the reviewer's name is not indicated, as in most of the items listed, the books have been given initialed or unsigned notices in the Selected Publications department of Volumes 1–6 and in the Short Reviews section of the Book Reviews department that began with Volume 7.
